## Evening Brief

Date: Thursday August 3, 2017

---

### Weather Summary

**\*\*\* Gusty winds across south central Idaho on Friday \*\*\***

**\*\*\* Critical dry lightning over far western Nevada on Friday then expanding east and north this weekend and into early next week\*\*\***

Northwest winds will increase over southeast Idaho on Friday ahead of an area of low pressure moving through the Northern Rockies.

Lightning will push northeastward across the western and northern Nevada Friday through the weekend and move north into Idaho by Monday. This is of particular concern as these are the same areas that will see unusually hot and dry weather through Thursday. A *High Risk* has been issued for lightning for portions of Nevada Friday and Saturday, then spreading into northern Utah by Sunday and Idaho by Monday. Thunderstorms will be a mix of wet/dry, however spotty precipitation initially after very hot and dry conditions will still bring the potential for new starts and spread with gusty outflow winds.

---

### Preparedness Levels

Great Basin	3
National	4

---

### Great Basin Fire Activity (from Irwin): Light Activity

**New Fires and Acres: 23 fires for 192.4 acres; 26,459 acres large fire growth; 0 new large fires**

---

### Resources:

- Crews: 12 T1 IHCs in GB: 11 committed, 1 Available.
  - GBCC has committed an estimated 65 + type 3, 4, 6 engines.
  - 2-T1 and 7-T2 helicopters are available in GACC.
- 

### Great Basin Fire Potential Summary

Near record fire danger indices for the time of year are being observed over the mountains of western Idaho with very high indices elsewhere across Idaho. Values are much lower across the south and east. As lightning activity increases across the northern half of the region over the weekend new IA and the potential for new large fires will increase.

We have issued a Great Basin **Fuels and Fire Behavior Advisory for Nevada, Idaho and Utah**, available at the following link:

[https://www.predictiveservices.nifc.gov/fuels\\_fire-danger/GB\\_Fuels\\_and\\_Fire\\_Behavior\\_Advisory.pdf](https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf)
